| 2018 VII-IX                                                       | 20,429                                                                | 4,598                                    | 6,524                                         | 6,832                                    | 3,793                                                        | 5,168                                       | 14,821                 | 3,556                    | 5,045                            | 8,596  |                       |              |                        |  |

(1) The structure of the private consumption expenditure estimates series has been changed in accordance with the Classification of Individual Consumption by Purpose (COICOP).

(2) No seasonal effect was found in these series.

(3) The estimates at 2015 prices were obtained by chaining estimates of each year at previous year prices. Due to the chaining, the expenditure components do not add up to the total.
