XII	157.7	148.5	178.7	124.6	107.3	113.3	101.7	93.3	101.5	93.3	99.9	101.0	101.2

- (1) As of January 2015 the updated Consumer Price Index is calculated according to the base: Average 2014=100.0. To compare previous indices, based on Average 2012=100.0, multiply the following as of January 2015: the Consumer Price Index by the chaining coefficient 1.020, the index excluding vegetables and fruit - by 1.020, and the index excluding housing - by 1.009.
- (2) As of January 2006, the updated wholesale price index of manufacturing output is calculated according to the base: Average 2005=100.0 (re: updating of the index, see the Appendix to the Price Statistics Monthly, No. 1, 2006, Hebrew only). To compare previous indices based on Average 1994=100.0, multiply as of January 2006 the general price index of manufacturing output by the chaining coefficient 1.791. As of January 2013, the updated wholesale price index of manufacturing output is calculated according to the base: Average 2012=100.0. To compare previous indices based on Average 2005=100.0, multiply, as of January 2013, the general index by the chaining coefficient 1.312 and the index excluding fuel by the chaining coefficient 1.255.
- (3) As of August 2011, the updated price index of input in residential building is calculated according to the base: July 2011=100.0 (re: updating of the index, see the Price Statistics Monthly, No. 8, 2011). To compare with previous indices, based on January 2004=100.0, multiply the index as of August 2011 by the chaining coefficient 1.323.
- (4) As of February 2010, the updated price index of road construction and bridging is calculated according to the base: January 2010=100.0 (re: updating of the index, see the Price Statistics Monthly, No. 2, 2010). To compare with previous indices, based on January 1992=100.0, multiply the index as of February 2010 by the chaining coefficient 2.262.
- (5) Indices as of February 2007 (based on January 2007=100) substitute the indices which were published for February-June 2007 (based on October-December 1993=100).
- (6) As of January 2013, the wholesale price index of manufacturing output is published according to the system of The Standard Industrial Classification of All Economic Activities 2011, and does not include mining, quarrying, and publishing activities. The index is calculated according to the base: Average 2012=100.0.

* Detailed data on price indices and prices of goods and services appear in the Price Statistics Monthly, on the CBS Website.
